

Class: Complete Laying Feed

Form: Mash

Description

Mesolay 114 is designed to be fed after peak production, in accordance to feed intakes of the hens. It is formulated using grains and cereals.

Benefits

Formulated as part of a feeding programme developed to optimise layer performance during the different phases of production according to the hen's feed intake.

Feeding Recommendations

Mesolay 114 should be fed ad lib after peak production. It should be fed where expected intakes of the hens are between 114 g and 120 g per bird per day. After peak production layers must be fed in accordance to the feed intake (3 or 4 week rolling average). Feed intake will be affected by environment, breed, housing and management.

Expected Intakes

114–120 g per bird per day

Composition

Nutrient	Quantity	Unit	Min/Max
Protein	130	g/kg	Min
Fat	25	g/kg	Min
Fibre	70	g/kg	Max
Moisture	120	g/kg	Max
Calcium	27	g/kg	Min
Calcium	45	g/kg	Max
Phosphorus	5	g/kg	Min
Total lysine	5	g/kg	Min
