

Class: Lactating Sow Feed

Form: Pellets / Meal / Crumble

Description

Milkyway is a complete lactating sow feed which has been formulated to address the specific needs of the lactating sow in order to maximise milk production and subsequent weaning weight.

Benefits

- Supports high-quality colostrum and milk production from the sow for an improved lactation.
- Promotes the healthy growth of piglets for heavier weaning weights.
- Optimal nutrients to support the maintenance of sow body condition during lactation.
- Promotes a higher conception rate after weaning.

Feeding Recommendations

LACTATING SOW

1. Feed 2.5 kg on the first day of farrowing (preferably split into 3 feeds per day, e.g. morning 1 kg, lunch 0.5 kg and supper 1 kg).
2. Increase by 0.5 kg per day until the sow reaches her maximum feed intake.

Tip: Adjust feeding amount according to sow appetite. Peak lactation normally occurs around day 21 after farrowing, with an average maximum feed intake at this stage of about 9 kg per day.

WEANING TO SERVICE

1. Feed ad libitum from weaning to service, thereafter change to **Sowcare**.

Composition

Nutrient	Quantity	Unit	Min/Max
Protein	150	g/kg	Min
Fat	25	g/kg	Min
Fibre	80	g/kg	Max
Moisture	120	g/kg	Max
Calcium	8	g/kg	Min
Calcium	12	g/kg	Max
Phosphorus	6	g/kg	Min
Total lysine	7.5	g/kg	Min
