

DROUGHT CUBES 10

Registration No: V 9901 Act 36 of 1947

Class: Drought Cubes for Ruminants
Contains Urea @ 10 g/kg max

Form: Pellets

Description

A cost-effective product with a wide range of uses providing the ruminant (cattle, sheep, goats, and game) with nutrients for optimal production.

Benefits

- 10 mm cube for ease of feeding and limits wastage.
- Ideal feed to supplement fibre when roughages are limited.
- Contains vitamins and minerals for optimal production.
- Ideal to achieve rumen fill in animals that have travelled long distances.

Feeding Recommendations

Can be fed ad-lib as a replacement for roughage during periods of drought.

Expected Intakes

Depending on the circumstances, feed intake will vary from 2 kg/day to a maximum of 8 kg/day.

NPN Warning

This feed may contain feed-grade urea / NPN sources and thus must be mixed and fed strictly according to recommendations:

1. Vinegar is an effective remedy against NPN (non-protein nitrogen) poisoning. Mix with equal amounts of water. Dose half a bottle per calf or large sheep or 2-4 bottles per head of cattle. (1bottle = 750ml)
2. Protect these feeds against rain. NPN is soluble and animals drinking such a solution can be poisoned.
3. Do not feed these feeds indiscriminately with other feed containing NPN. Consult an animal scientist.
4. Mix concentrates thoroughly with the prescribed ingredients.
5. This is a supplement and not a feed. Sufficient grazing and/or roughage must be available at all times.
6. Ensure that feed troughs are always full and give animal's free access to grazing.
7. A salt-phosphate lick must be fed for a minimum of seven days prior to feeding any animal a NPN containing lick.
